# WORKSHEET

## Tree Diagram

### Time:

From the beginning of the didactic unit until the end of the course.

### Instructions for students:

Each student will make their own tree diagram, drawing a branch for each favor they make. Each person who has received a favor, will have to do favors to other people. The objective is to check in the stipulated period of time how many people have been helped and the number of favors performed. In addition, after doing the corresponding tree diagram, they will be able to calculate the probability that a person "X" is done a favor, has been helped.
